

DNA EVIDENCE

Across

9. DNA stands for ---
 10. DNA molecule are made up of sugar (deoxyribose) and -----molecules.
 11. ___stands for combined DNA Index system
 12. The order of the bases determines the

13. Several factors can affect the ____ left at a crime scene, such as environmental factors
 14. guanine (G) always pairs with

Down

1. DNA can identify a victim through DNA from
 2. DNA collected from a crime scene can

3. DNA collected from a crime scene can link a
 4. DNA contains
 5. Adenine (A) pairs with
 6. the middle of the molecule are made up of pairs of.
 7. DNA can place an _____ at a crime scene
 8. Each person's DNA is _____ from other people (except identical twins).
