

DNA REPLICATION

Across

- 3.** WHERE DNA replication occurs in eukaryotes
- 7.** A nitrogen base that pairs with thymine
- 8.** The fact that certain bases always pairs with each other is called the _____
- 9.** A nitrogen base that pairs with cytosine
- 10.** WHEN DNA Replication occurs

- 11.** known as the unzipping enzyme

Down

- 1.** Bonds between nucleotides
- 2.** Deoxyribose sugar, nitrogen base, and phosphate group are all apart of a _____
- 4.** the process of making new DNA from old DNA
- 5.** The form when a DNA model is twisted into a spiral
- 6.** These speed up reaction
