

Name: \_\_\_\_\_

# DNA Replication by: Travis Bryant

## Across

2. DNA Replication takes place in the \_\_\_\_\_ phase?

4. What is an example of when DNA Replication takes place to create a living thing?

6. The DNA Polymerase is considered a \_\_\_\_\_?

8. What causes the "unzipping" of the double helix structure?

9. What makes the "primer" so that DNA polymerase can build?

10. What is the DNA process of copying a double-stranded DNA molecule, both strands serve as templates for the replication of the opposite strand.

## Down

1. Where does DNA Replication start?

3. Where does DNA Replication take place?

5. What usually ends in -ase?

7. What "glues" the DNA fragments?
