

Name: \_\_\_\_\_

# DNA and Protein Synthesis

## Across

- 2. Where DNA is
- 4. It's complementary base pair is Thymine
- 6. The full name for DNA
- 8. The structure of the DNA molecule?
- 10. protein \_\_\_\_\_ means making proteins
- 14. DNA is organised into these structures in the nucleus

- 15. The name of three bases together

## Down

- 1. It is paired with cytosine in double-stranded DNA
- 3. Where protein is synthesized
- 5. Made of a sugar, phosphate and a base
- 7. Where in a cell are the ribosomes found?

- 9. What is produced from DNA and used to produce proteins?

- 11. mRNA is \_\_\_\_\_ stranded
- 12. Number of different bases
- 13. DNA is \_\_\_\_\_ stranded
