

DRINK IT IN 8.3 & 8.4 VOCAB

Across

- 2. group of organs that work together to preform a specific function
- 3. When the concentration of two solutions is the same
- 9. diffusion of water through a selectively permeable membrane.
- 10. group of tissues that work together to preform closely related functions

- 11. The process by which particles move from an area of higher concentration to an area of lower concentration

- 12. Water channel protein in a cell

Down

- 1. Process of diffusion in which molecules pass across the membrane through cell membrane channels
- 4. the solution with less concentration of two solutions

- 5. pressure applied to prevent osmotic movement across a selectively permeable membrane

- 6. Relatively constant internal physical and chemical conditions that organisms maintain

- 7. the solution with the greater concentration of two solutions

- 8. group of similar cells that preform a particular function
