

# Data Analysis/Statistic

## **Across**

- 2.** Values that divide a data set into four equal parts
- 7.** A value that is much greater than or less than the other values of a data set
- 8.** Numbers that are used to describe the center of a set of data. These measurements include the mean, median, and mode
- 9.** The difference between the greatest number and the least number in a data set
- 10.** A measure of center in a set of numerical data

## **Down**

- 1.** A question that anticipates and accounts for a variety of answers
- 3.** For a data set with median M, the first quartile is the median of the data values less than M
- 4.** The number(s) or item(s) that appear most often in a set of data
- 5.** The sum of the numbers in a set of data divided by the number of pieces of data
- 6.** The sum of two or more quantities divided by the number of quantities; the mean
