

# Diversity in Living Organisms

## **Across**

- 3.** Warm blooded animals having hairs on skin  
**4.** simplest multicellular non-motile animals  
**8.** Triploblastic flat bodied animals  
**9.** Gave binomial nomenclature  
**11.** Spiny skinned exclusively marine animals

- 12.** Most primitive organisms without definite nuclear membrane  
**13.** Cylindrical pseudocoelom body  
**14.** First vascular land plants  
**15.** Cold blooded animals that can breathe only through lungs

## **Down**

- 1.** Perennial evergreen plants with naked seeds

- 2.** The regions rich in diverse forms of life  
**5.** Includes largest groups of invertebrates  
**6.** Exclusively aquatic vertebrate  
**7.** Have mucus on skin which helps them in cutaneous respiration  
**10.** Amphibious plants having leaf like structure
