

Name: _____

Date: _____

Early Adulthood

Across

2. The period of late adulthood during which the focus is on tasks that have personal meaning.
8. The period from the end of teenage years through early 20's in which people are still sorting out their options for the future.
9. The combination of responses or ideas in novel ways.
10. The assessment of an event to determine whether its implications are positive, negative, or neutral.
11. Thinking that acknowledges that adult predicaments must sometimes be solved in relativistic terms.

Down

1. The natural physical decline brought about by aging.
3. The effort to control, reduce, or learn to tolerate the threats that lead to stress.
4. This personality type prefers highly structured tasks. They make good clerks, secretaries, and bank tellers.
5. The tendency to marry someone who is similar in age, race, education, religion, and other basic demographic characteristics.
6. The evaluation of a role or person by other relevant members of a group or society.
7. Couples living together without being married.
