

Earth Science Ch. 7 Cross Word Puzzle

Across

2. The freeze-thaw cycles of water in the cracks of rocks.
5. Soil whose parent material is the local bedrock.
7. A type of weathering in which rocks and minerals break down into smaller pieces.
8. The process by which outer rock layers are stripped away.
9. The removal of weathered rock and soil from its original location.

Word Bank

Mechanical Weathering
Weathering
Chemical weathering
Gully erosion

Soil
Frost wedging
Erosion

Residual soil
Rill erosion
Exfoliation

10. The process in which materials on or near Earth's surface break down and change.

Down

1. A type of weathering in which rocks and minerals undergo changes in their composition.
3. When a Rill Erosion channel becomes deep and wide.
4. When running water cuts small channels into the side of a slope.
6. The loose covering of weathered rock particles and decaying organic matter.
