

Earth Science Concepts

Across

- 3. a map marked with contour lines.
- 7. a mountain or hill, typically conical, having a crater or vent through which lava
- 9. The geological processes
- 10. the reduction in volume of the fuel mixture in an internal combustion engine before ignition.
- 12. a crack in the Earth's crust

- 13. a sudden and violent shaking of the ground
- 14. places where plates slide sideways past each other
- 15. the gradual movement of the continents across the earth's surface.

Down

- 1. it is the biggest crash scene on earth
- 2. a linear feature that exists between two tectonic plates that are moving away from each other.

- 4. A tectonic boundary where two plates are moving away from each other
- 5. a hypothetical super continent that included all current land masses
- 6. a line on a map joining points of equal height above or below sea level.
- 8. to bend
- 11. a crack, split, or break in something
