# Earth Scientists

## Across

- 1. studies weather patterns, clouds, and storms
- 3. studies earthquakes, seismic waves, and earth's interior
- 6. studies the atmosphere to understand climate changes
- 7. studies minerals
- 8. studies areas affected by our oceans

10. studies everything outside Earth's atmosphere

- 12. studies fossils
- 13. studies the composition and structure of rocks
- 14. classifies and identifies layers of rock (strata)

## Down

2. studies surface and underground fresh water

4. studies volcanoes and volcanic activity

5. studies inland waters (lakes, rivers, streams)

9. studies solid, rocky parts of the earth

11. uses technology to solve problems

## Word Bank

paleontologist  
geologist  
climatologist  
astronomer

marine geologist  
volcanologist  
limnologist  
meteorologist

seismologist  
mineralogist  
hydrologist

stratigrapher  
engineer  
petrologist
