

# Earth science part 2

## Across

1. This is where meteorites burn up

8. The result of uneven heating by the sun on the earth's surface

9. Weather the state of the

12. This is where ozone layer is found

13. A greenhouse gas

16. Used in light bulbs

18. This is where water droplets begin to condense

19. The study of earth's atmosphere

20. This is where most of the weather occurs

## Down

2. This is where satellites orbit

3. A condition where the pressure is above average

4. It is the layer of gases surrounding the earth

5. Also known as "heat retention"

6. This represents the amount of water vapor in the atmosphere or a gas

7. The hottest layer of the atmosphere

10. The average course or condition of the weather

11. Also known as depression or cyclone

14. An example of a phenomena

15. Essential for respiration

17. A trace gas
