# Earth's Layers

## Across

- 3. The crust and upper mantle divided into several constant moving plates of solid rock.
- 4. Innermost layer of earth.
- 7. Crust (oceanic and continental) , mantle, core.
- 8. Earth is divided into layers.
- 10. Very hot solid sphere in the center of Earth.
- 11. Soft upper layer of mantle where the lithosphere floats.

## Down

- 1. Lithosphere, asthenosphere, mesosphere, outer core, inner core.
- 2. Lower part of the mantle between the asthenosphere.
- 5. A molten iron and nickel surrounding the inner core.
- 6. Thickest layer lying on the outer layer.
- 9. Earth's outermost layer.
