

Name: _____

Date: _____

Earth's Resources

Across

- 6. The process of moving weathered rocks
- 8. Melted rock beneath Earth's surface
- 10. The process of breaking down rock
- 11. Igneous rock that cools quickly on the surface of Earth

Down

- 1. The breaking down of rock into smaller pieces by a physical action

- 2. Decomposition of rock caused by chemical reactions resulting in the formation of new compounds
- 3. Rocks that undergo intense heat and pressure to change the rock
- 4. Rock formed by compaction and cementation
- 5. The settling of weathered rocks
- 7. Igneous rock that cools slowly beneath Earth's surface
- 9. Rock formed by melted rock that has cooled and hardened
