

Earth's Resources Worksheet

1. Parts of the environment that supply materials useful or necessary for the survival of living things
 2. Natural resources that are being used up faster than they can be replaced by natural processes
 3. Natural resources that will NOT run out, no matter how much of it people use
 4. Thermal energy from within Earth
 5. Solar Cookers use this kind of energy
 6. Wind is an inexhaustible resource produced by the uneven heating of the atmosphere by the sun
 7. Topsoil is the upper most layer of this
 8. Formed from decayed remains of organisms that dried over millions of years
 9. All organisms need this to survive
 10. This contains carbon dioxide and oxygen
 11. Nonliving substances found in Earth's crust
 12. Natural resources that can be replenished by natural processes faster than they are used
 13. An example of a mineral
 14. An example of a fossil fuel
 15. This is renewed through the water cycle
 16. Molten rock or magma rises close to the surface of Earth's crust and...
- A. Wind Power
 - B. Inexhaustible Resources
 - C. Water
 - D. Minerals
 - E. Renewable Resource
 - F. Air
 - G. Nonrenewable Resources
 - H. Heats Water
 - I. Magnesium
 - J. Coal
 - K. Freshwater
 - L. Land
 - M. Fossil Fuels
 - N. Natural Resources
 - O. Geothermal Energy
 - P. Solar Energy
