

Earths structure

Across

- 1. The boundary that collides
- 3. The crust where we can stand, where we live "continents"
- 4. It's the solid part of the core
- 8. Divergent does what
- 14. Transform does what
- 15. a long, narrow ditch
- 16. It's located on the outer layer of earth
- 17. It's within the crust

- 18. is a massive, irregularly shaped slab of solid rock, generally composed of both continental and oceanic lithosphere
 - 19. The boundary that spreads
- Down**
- 2. The boundary that slides
 - 5. The crust with majority of water
 - 6. the sideways and downward movement of the edge of a plate of the earth's crust into the mantle beneath another plate.
 - 7. Convergent does what

- 9. The continents before separation were called _____
- 10. It's a part of the core that's liquid
- 11. It's at the very center of earths layers
- 12. is found beneath the surface of the earth and is amixture of molten or semi-molten rock
- 13. Its plasticity and is in between the core and crust
