# Ecosystems

## Across

2. Land that is mostly covered with woods or dense growths of trees and shrubs.
4. A dense forest found in tropical areas of heavy rainfall and the vegetation tends to grow in three layers.
6. A community of interacting organisms and their physical environment.
8. An area, such as a prairie or meadow, of grass or grass like vegetation.
10. A vast treeless zone and has permanently frozen soil.

## Down

1. The variety of life in the world or in a particular habitat or ecosystem.
3. A process that shows how food energy moves from one organism to another in a given environment.
5. An animal that naturally preys on others.
7. An animal that is hunted and killed by another for food.
9. A dry, often sandy region of little rainfall, extreme temperatures, and little vegetation.
