

Electrical Circuits

Across

2. The symbol for this component is an - X -

5. Cells connected together form a

7. The instrument used to measure current

8. A bulb converts electrical energy into

9. This circuit has multiple pathways

11. Component used to complete or break a circuit

Down

1. The instrument used to measure voltage

3. This circuit has only one pathway

4. Provides the energy in a circuit

6. A gap in a circuit is called a

10. Units of current
