

Electrical Crossword puzzle

Across

- 1. Side of where you would find start/stop buttons
- 5. who discovered ac voltage?
- 9. Sensor that is able to detect a nearby ferrous material
- 12. most common way to connect two wires
- 13. component that makes voltage lag current in a circuit

15. A contactor with a set of overloads

16. Flow meter that involves the use of two transducers

Down

- 2. What capacitive reactance is measured in
- 3. Flow meter based on Faradys Law
- 4. Most commonly used AC induction motor
- 6. Unidirectional device used for switching

7. Commonly used acronym for the color of wire used in 3 phase systems

8. Total resistance found in a circuit

10. component that makes voltage lead current in a circuit

11. Two terminal electrical device that conducts primarily in one direction while having high resistance in the other

14. Unit that power is measured in
