

Electricity and magnetism

Across

5. How many poles does a magnet have?

6. Magnets attract objects made of _____.

7. Magnetic poles that are alike _____ each other

8. Which subatomic particle has a positive charge?

9. The current has only has one path to flow through in this type of circuit.

10. What do we call the poles of a magnet?

Down

1. This type of circuit contains two or more branches for current to move through.

2. A material in which electrons are NOT able to move easily

3. A material in which electrons are able to move easily

4. Circuits in homes are usually wired in
