

# Electricity vocabulary

## Across

- 6. a steady flow of electrons
- 8. The ability to do work. Anything that makes matter move or change.
- 9. The pushing and pulling by moving electrons
- 10. The complete loop through which an electrical current can pass
- 11. energy from interactions between charged particles(electrons)

## Down

- 1. Energy that comes from sources that do not pollute the earth
- 2. when energy is changed from one form to another. for example electrical energy into light energy
- 3. Energy sources found in nature that have not been subjected to any conversion to transformation process.
- 4. energy which has been transformed from another source
- 5. the Presence or movement of charged particles called electrons
- 7. a push or pull
