

Electrolysis

Across

5. Positively charged electrode
 6. Positively charged ions are called _____
 7. The gain of electrons (Rig)
 8. A list of elements in order of their reactivity
 9. A substance that conducts electricity when molten or dissolved in water

10. $H^+ + OH^- =$ _____

Down

1. The loss of electrons (Oil)
 2. Negatively charged electrode
 3. Used to represent the reaction that happens at an electrode
 4. Negatively charged ions are called _____
