

Electrolysis

Across

- 2. a metal that drink cans are made of, atomic number
- 5. the separating of a solution using an electric current
- 8. negative electrode
- 9. positive electrode
- 10. atom that has gained or lost an electron
- 11. made of two or more separate elements

Down

- 1. flow of electricity
- 3. a liquid made up from a solute in a solvent
- 4. a gas that is the first element on the periodic table
- 6. a gas that we use in respiration and plants release during photosynthesis
- 7. a solid that is usually shiny, conducts electricity and heat
