# Elements

**Across**

- 2. Atomic mass is 95.94
- 5. 3 protons and is in the 2nd period
- 8. Used to make object to float like balloons
- 11. Nonmetal with 8 protons
- 12. Has 27 eletrons
- 13. First element in group 14

- 16. Synbol is AG
  - 18. Has 35 protons
  - 19. Has 10 electrons
  - 20. Metalloid with 1 proton
- Down**
- 1. Atomic mass is 22.99
  - 3. first element in group 10
  - 4. Used to clean pools with 17 protons and can be a gas

- 6. We inhale this element
- 7. a liquid and a metal
- 9. has 7 protons
- 10. has 86 protons
- 14. has 5 protons
- 15. Symbol is SI
- 17. Very expensive element with 79 protons

**Word Bank**

- |        |          |          |          |            |
|--------|----------|----------|----------|------------|
| Neon   | Oxygen   | Lithium  | Bromine  | Molybdenum |
| Silver | Cobalt   | Sodium   | Hydrogen | Helium     |
| Carbon | Chlorine | boron    | Nickel   | Silicon    |
| Gold   | Mercury  | Nitrogen | Radon    | Oxygen     |
