

Elements & Principles Of Photography

Across

- 1. all parts relate well to each other
- 2. feeling of harmony between all parts of work
- 3. the area between and around an object. space around object, negative space. space can also be depth
- 6. one or more element of design is used repeatedly to create organized movement
- 11. distribution of visual weight; symmetrical vs. asymmetrical vs. radial

- 12. a mark with greater length than width. horizontal, vertical, diagonal; straight or curvy; thick or thin
- 13. three dimensional shapes; express length, width, and depth.
- 14. use of several elements of design to hold viewers attention
- 15. repeating of an object or symbol

Down

- 4. focal point; piece that catches attention
- 5. path one's eyes take; often leading to a focal point

- 7. works with pattern to make art seem active; repetition of elements of design
- 8. a closed line; geometric or free-form; flat-express length and width
- 9. hue, value, intensity; white, pure light; black, absence of light; primary vs. secondary vs. intermediate; complementary
- 10. surface quality; seen or felt; rough, smooth, hard, soft
