

Elements

Across

3. found in group 5 and its atomic mass is 262
 4. Found in group 14 and its atomic number is 82
 9. Its found in group 10 and its worth 5 cents
 10. This metal was named after Albert Einstein
 11. something important plants give out

13. found in group 18 and it makes balloons float

15. Found in group 6 and its atomic number is 42

Down

1. Found in group 13 and starts with our state (CA)
 2. H₂
 5. The strongest metal
 6. found in group 14 and its atomic number is 14

7. Whats supermans weakness

8. has the lowest metallic melting point in a metal

12. found in group 11 and its atomic mass is 197.0

14. its found in group 12 and its atomic mass is 65.4
