

Elements

Across

5. Bars of _____
6. Silver, Low density, high strength
8. Discovered 1746, Zn
9. Magnetic
10. hard, brittle, dense, transition metal of platinum family

Down

1. Hard and ductile
2. 1907°C melting, hard and brittle
3. Highest melting point, solid at room temp
4. Ag 47
7. was called hydrargyrum
