

Name: _____ Date: _____

Endocrine Glands and Hormones

- | | |
|----------------------------------|------------------------|
| 1. Growth Hormone (GH) | A. Anterior Pituitary |
| 2. Oxytocin | B. Thyroid |
| 3. Triiodothyronine T3 | C. Posterior Pituitary |
| 4. Somatropin | D. Testes |
| 5. Antidiuretic Hormone | E. Anterior Pituitary |
| 6. Epinephrine (adrenaline) | F. Ovaries |
| 7. Testosterone | G. Anterior Pituitary |
| 8. TSH | H. Anterior pituitary |
| 9. Vasopressin | I. Parathyroids |
| 10. Adrenocorticotrophic hormone | J. Anterior Pituitary |
| 11. Thyroxine T4 | K. Anterior Pituitary |
| 12. Parathyroid Hormone (PTH) | L. Adrenal Medulla |
| 13. Corticosteroids | M. Thyroid |
| 14. Insulin | N. Posterior Pituitary |
| 15. Estrogen | O. Pancreas |
| 16. Gonadotropic Hormone | P. Adrenal Cortex |
| 17. Calcitonin | Q. Thyroid |
| 18. Norepinephrine | R. Ovaries |
| 19. Follicle-stimulating hormone | S. Pancreas |
| 20. Parathormone | T. Adrenal Medulla |
| 21. Androgens | U. Posterior Pituitary |
| 22. Amylin | V. Anterior Pituitary |
| 23. Progesterone | W. Thyroid |
| 24. Luteinizing Hormone | X. Adrenal Cortex |
| 25. Mineralocorticoids | Y. Adrenal Cortex |

26. Melanocyte-stimulating hormone (MSH)

Z. Parathyroids
