

Energy

Across

2. formed from the buried remains of dead animals and plants from the early ages
 3. energy generated by fissions fusing of atoms to heat water to produce steam to turn a turbine
 11. is the most plentiful fossil fuel in the united states
 12. not capable of being replenished
 13. energy from using heat below the Earth to heat up water or to turn turbines

14. used to make oil, gasoline and other fossil fuel types
 15. careful and responsible management of resources
 16. is an organic matter from plants and from animal waste that contains chemical energy

Down

1. the way you choose to change//changing laws and habits
 4. protection and wise use of natural resources
 5. produces the lowest levels of air pollutes

6. energy generated by the wind turning a turbine
 7. happens when something is given up to gain something else
 8. energy generated from water spinning a turbine
 9. able to be replenished and does not get discarded when used
 10. energy from the sun and is stored as chemica energy
