

Energy Sources

Across

- 1. Oxygen or Carbon Dioxide
- 4. The total mass of organisms in a given area or volume
- 7. Windmills use this to convert energy
- 8. Hydroelectric Power
- 10. Prevention of wasteful use of a resource

- 11. Made from the remains of dead animals
- 12. Energy released during nuclear fission
- 14. A natural resource that is easy to reproduce
- 15. Energy that is produced from the sun radiation

Down

- 2. The act of keeping something in stable condition; Maintain

- 3. Energy that takes millions of years to create
- 5. Zero-emission fuel burned with oxygen
- 6. Heat coming from the earth
- 9. Liquid Fuel
- 13. Formed when dead plant matter decays into peat and is converted
