

Energy

Across

- 2. a form of potential energy that can be absorbed or released during a chemical reaction
- 6. Potential energy stored as a result of deformation of an elastic object.
- 7. Energy an object has due to motion
- 8. Energy within the nucleus of an atom
- 9. Energy released by a chemical reaction

- 10. energy that can move through empty space

Down

- 1. energy an object possesses because of its position in a gravitational field
- 3. Energy that comes from the electrons within atoms
- 4. created when motion of atoms and molecules that occurs within an object
- 5. the sum of both kinetic energy and potential energy
