

Name: _____

Date: _____

Energy transformation

Across

6. Energy which has been transformed from another source
7. Is energy that is stored between the particles within atoms
8. Is the presence or movement of electrons
9. Is energy from interaction between charged particles
11. Energy sources found in nature that has not been subjected to any conservation or transformation process

Down

1. Law that states that energy cannot be created or destroyed in a system
2. A push or pull
3. Heat energy of molecules
4. Something that does not pollute the environment
5. The complete loop through which an electrical current can pass
10. A steady flow of electrons
