

# Engineering

**Across**

- 1. Type of engineer who designs, develops, and maintains machinery
- 3. Type of engineer who researches and uses qualities of elementary particles (particles of matter that make up our world) to improve our lives
- 5. Type of engineer who strengthens computers' defenses against viruses, and administers other sorts of programming (J---)
- 11. Type of engineer who develops and designs furniture
- 14. Type of engineer who attempts to treat the injuries and diseases of animals
- 15. Type of Engineer who is responsible for products that move, or involve movement in any way (k-----c)
- 16. Type of engineer who seeks to design more effective and less dangerous x-ray machinery
- 17. Type of engineer who increases efficiency of programs and computers (d-----l)

- 18. Type of engineer who constructs and makes use of able AI (Artificial Intelligence) to improve humans lives
  - 19. Type of engineer who designs animal habitats and other microcosms
  - 23. Type of engineer who constructs satellites for the purpose of taking images of the universe
  - 24. Type of engineer who endeavors to allow quicker and accurate communications (radio towers, satellites)
  - 25. Type of engineer who maintains utilities
- Down**
- 2. Type of engineer who tries to eliminate waste of time, money, materials, by developing machines to ameliorate lives (think of a synonym to "hard-working")
  - 4. Type of engineer who maintains sewers and other water transmissions (water o-----r)
  - 6. Type of engineer responsible for our Heating, Ventilation, and AC
  - 7. Type of engineer who creates medical equipment, using both engineering and biology

- 8. Type of engineer who tests manufactured items to test their legitimacy and deem if they're acceptable (L-b Q-----y)
- 9. Type of engineer who develops artificial limbs and organs for the unfortunate
- 10. Type of engineer who seeks to discover the life in the depths of the ocean, and constructs marine technology to do this
- 12. Type of engineer who insures protection of the environment by exercising rights, or by researching possible methods of defense
- 13. Type of engineer who deals with the design and construction of roads, buildings, bridges, etc?
- 20. Type of engineer who act as arbiters for the quality of items
- 21. Type of engineer who researches and builds aircrafts?
- 22. Type of engineer who manipulates DNA to achieve the desired qualities of an organism (crop, animal)
