

Name: \_\_\_\_\_

# Engineering Scavenger Hunt

## Across

- 4. Builds anything requiring electrical outputs
- 5. Helps mechanics build, and fix mechanical devices
- 10. Installs AC's
- 13. Creating new looks and designs to make it a better yacht that sells for more than normal
- 15. Part of a maintenance team on vessels, usually army vessels
- 16. Specializes in internals of any type of computer
- 17. making designs and nice appearances for cars

- 18. Maintain and supply storage for natural gas
- 19. Draw/draft new blueprints for buildings
- 21. Runs wires, and fixes lighting issues
- 22. Maintain/fix AC's

## Down

- 1. Solves issues, and find new/better ways to do it
- 2. Mainly deals with scientific or mathmatic problems
- 3. Makes sure everything produces in higher quality

- 6. Deals with anything that involves nuclear physics
- 7. Creates things that absorb energy from the air's flow
- 8. Creates cars looks and designs
- 9. Fixes, makes new releasing software better
- 11. studies environment, finding ways to preserve the earth
- 12. Works with, and fixes computers
- 14. creates robotic designs that do human like things
- 20. Inspects airplanes for adjustments
