

Environmental Science 1

Across

- 2. A group of individuals that belong to the same species and live in the same area
- 6. Belief that whole ecological systems have value.
- 7. An individual living thing
- 10. The study of the interaction of humans with the natural environment
- 12. Incorporates concepts and ideas from multiple fields of study

13. All the different populations that live together in an area

Down

- 1. The variety of life in the world or in a particular habitat or ecosystem.
- 3. The study of the relationships between organisms and the biotic and abiotic parts of the environment
- 4. The tendency of a shared, limited resource to become depleted because people act from self-interest for short-term gain.

5. Part of Earth in which life exists including land, water, and air or atmosphere

- 8. A human-centered view of our relationship with the environment.
- 9. A community of organisms and their abiotic environment
- 11. A term that typically describes a species that no longer has any known living individuals.
