

Evolution Puzzle

Across

- 5. Organ that serves no purpose in an organism.
- 6. Bird that Darwin studied.
- 9. Organisms habitat and its job in the habitat.
- 11. Evidence of an ancient organism.
- 12. Group of genes in a population.
- 14. Process that enables organisms to become better suited to their environment.

- 15. Process by which modern organisms have descended from ancient organisms.

Down

- 1. Scientist who studies fossils.
- 2. Traits and behaviors that help an organism survive and reproduce.
- 3. Method of measuring rates of decay of radioactive materials.

- 4. Used to determine the age of fossils by comparing with other fossils.

- 7. Process in which new species evolve from old species.
- 8. Length of time required for half of the radioactive atoms in a sample to decay.
- 10. Amount of organisms of the same species in a certain area.
- 13. Largest interval of time in a time scale.
