

Evolution Vocab

Across

9. Preserved remains or traces of ancient organisms
 11. Heritable characteristic that increases an organism's ability to survive and reproduce in an environment
 12. A group of living organisms that consist of similar individuals
 13. Information stating whether a belief is true
 14. Variation in the frequency of different genotypes in a small population

Down

1. The intentional breeding of plants or animals
 2. Process by which organisms that are most suited to their environment survive and reproduce most successfully.
 3. The ability to survive to reproductive age
 4. A naturalist, with a widely accepted theory of evolution
 15. Change over time

5. A disaster that significantly reduces a population
 6. The formation of new species throughout evolution
 7. The total of the characteristics given to a child genetically from their parent
 8. The different genes in an interbred population
 10. A group of organisms from one species that live in the same place, at the same time
