

# FOOD CHAINS & FLOW OF ENERGY

## **Across**

- 3.** A kind of animal that eats either other animals or plants.
- 7.** Organisms that get their energy from eating other organisms
- 8.** Very small organisms like bacteria or fungi.
- 9.** A system of interlocking and interdependent food chains.
- 10.** Organisms that can make their own energy through photosynthesis.

## **Down**

- 1.** Organisms that break down dead or decaying organisms, and in doing so, they carry out the natural process of decomposition.
- 2.** A series of organisms each dependent on the next as a source of food.
- 4.** A biological community of interacting organisms and their physical environment.
- 5.** An animal that gets food from killing and eating other animals.
- 6.** An animal that gets its energy from eating plants, and only plants.
