

Name: _____

Date: _____

Facial Services

Across

2. Opaque, colourless gel-like liquid that fills the cell.
 3. Transports nutrients from the digestive system to every system of the body
 5. Best class ever
 7. Carb digesting enzyme
 14. Produces extra cellular matrix and collagen, providing a structural framework for tissues
 15. Sausage -shaped bodies that supply the cell with energy during the process of respiration
 17. Protein that acts as a catalyst
 19. Separates the inside from the outside of the cell

20. An organelle that has a dense area of cytoplasm near the nucleus,
 22. A natural occurring polysaccharide (acid) that has an important role in our skin moisture content

Down

1. Breaks down proteins into Amino Acids
 4. Breaks down proteins into Amino Acids
 6. control centre or brain of a cell and is considered an organelle.
 8. Best teacher ever
 9. Small stacks of closely flattened sacs, which collect secretory products from the Endoplasmic Reticulum

10. Secretes certain hormones
 11. System that stimulates all the organs of the digestive system through nerve impulses
 12. Spherical bodies, which contains digestive enzymes to destroy bacteria, and worn out parts of a cell.
 13. Bundles of fine (micro) tubules and play a part in cell reproduction.
 16. White, fibrous tissue made up of proteins that Provides strength and resilience
 18. Fat digesting enzyme
 21. Very stretchy protein made up of yellow elastic tissue which form elastic fibres
