

# Factors affecting child development

## Across

3. An external factor relating to someone close dying

5. These factors arise from the child's personality and from things happening inside - no one else is involved

7. If a person is picked on, one might say this happens to them

9. Everyone goes through this transition but if it is early it might affect their social development

10. These types of children are brought up by individuals who are not their parent(s)

## Word Bank

education

bereavement

internal

looked after

bullied

abuse

changing country

external

circumstances

puberty

poor health

11. This factor is about how much you study

## Down

1. These factors that affect a child are from things in the environment or from other people

2. If a child is brought up in different places e.g. England and Spain

4. Everyone is individual and they have different life C

6. A person is said to have this if they are often ill and absent from school

8. Some times children experience different types of this e.g. sexual
