

# Finding Fossil Fuels

**Across**

3. This fossil fuel is used in many vehicles

7. These are used to capture solar energy

8. Gases in the atmosphere that reflect heat back down are called \_\_\_\_\_ gases.

9. \_\_\_\_\_ can never be created or destroyed

10. This is a source of renewable energy

11. this means "buried"

13. The spinning Earth and the sun's heat generate \_\_\_\_\_.

**Down**

1. Three ways to cut down on fossil fuels are to reduce, reuse, and \_\_\_\_\_.

2. Fossil fuels are \_\_\_\_\_ sources of energy.

4. Currently the fastest growing source of renewable energy.

5. A word that means indefinitely reliable is \_\_\_\_\_.

6. Solar panels \_\_\_\_\_ the sun's energy to a form we can use.

12. The \_\_\_\_\_ is a source of renewable energy
