# Fire Hazards in the Workplace

## Across

- 3. When left on a windowsill and magnified by the sun, can become a fire hazard
- 7. This could lead to the employer being in violation of safely maintaining electrical appliances
- 9. This can lead to evacuation problems in the event of a fire
- 10. Often used at Christmas or for parties

- 11. Often used by women and forgotten to be turned off
- 12. When used by someone with memory problems or confusion, the risk of fire may be high

## Down

- 1. Used to disperse scents into the air and create an atmosphere, can cause problems when left U\_\_\_\_\_
- 2. May ignite inside the electrical kitchen appliance due to lack of cleaning
- 4. Gathered in plug sockets and near electrical appliances, may spark and ignite
- 5. Used in the support of physical conditions to improve breathing and intake
- 6. This can be resolved by rearranging electrical appliances around the room
- 8. This is a common cause of kitchen fires
