

Food Science

Across

2. hydrogen atom that's positively charged
4. equal number of positive and negative charges
6. produce hydroxide ions in water based solutions
7. naturally occurring color pigments that changes color
8. developed to express the degree of concentration number

9. atoms that's bonded to a water molecule

10. forming of ions

Down

1. all ions in a solution have combined chemically
3. OH group that becomes a negatively charge
5. substances that produce hydrogen or hydronium ions
