

Forest Science Chapter 7

Across

- 3. Pollution In Cities
- 6. Biotic And abiotic byproduct contamination
- 11. Body of water rich in nutrients
- 14. Intensive animal farming or industrial livestock production
- 15. Branch of biology studying plants
- 16. Environment in which organisms live in
- 18. Materials that emit nuclear particles

- 19. Determines amount of organic matter in water
- 20. Broad class of substances containing carbon

Down

- 1. Organisms that live underwater
- 2. Process of water becoming rich in dissolved nutrients
- 4. Pollution from factories
- 5. Pollution from heated water
- 7. Any non organic compound
- 8. Materials released by plants and animals

- 9. Pond used to cool water
- 10. Helps cool heated water
- 12. Environment relating to living organisms
- 13. Any water affected by human waste
- 17. Farm animals regarded as an asset
