

Fourth Grade Science

Across

- 2. a complete path that electricity can move through
- 8. when an electrical charge flows into the ground
- 10. a circuit in which the current must flow through each electrical device in order to complete the circuit

Down

- 1. a buildup of electrical charge

- 3. the energy caused by the flow of electrical charges
- 4. a discharge of static electricity from a thundercloud
- 5. when two objects are pulled together
- 6. a material through which heat or electricity flows easily
- 7. a push or pull by one object to move another
- 9. when a buildup of electrical charge empties into something
