

# Free Will and Determinism

## **Across**

- 3.** This person claims, if individual remains controlled by other people or things they cannot take responsibility of their actions
- 4.** An individual is in charge of their own actions
- 7.** Research based on the belief that all events have a cause
- 10.** All behaviour is caused by previous experience

**11.** This person suggest that we should separate behaviour into physical and mental realms

**12.** Each individual has the power to make choices about their behaviour

## **Down**

**1.** Behaviour is determined by innate drives and early experiences

**2.** This person claimed behaviour is always determined

**5.** A chaos theory

**6.** Research into the human genome producing evidence of genetic influences on behaviour

**8.** Behaviours controlled by external/internal factors acting upon the individual

**9.** Self determination has a necessary part in human behaviour
