

Fresh Water III

Across

- 2. having minute spaces or holes through which liquid or air may pass
- 6. land consisting of marshes or swamps
- 11. The fall of water droplets from the clouds
- 13. the process of turning from liquid into vapor
- 14. the ability of a liquid to flow in narrow spaces without the assistance of, or even in opposition to, external forces like gravity
- 15. nutrients in a lake or other body of water, frequently due to runoff from the land

- 16. a body of broken up rock that can contain or transmit groundwater
- 17. give off water vapor through the stomata
- 19. any property that is measurable whose value describes a state of a physical system
- 20. molecule with non-uniform positive and negative charges

Down

- 1. the process by which water on the ground surface enters the soil
- 3. any of a material's properties that becomes evident during, or after, a chemical reaction
- 4. a large natural or artificial lake used as a source of water supply

- 5. the conversion of a vapor or gas to a liquid
- 7. the flow of water over the surface of the ground occurring when rainfall is not absorbed into the soil or evaporated
- 8. all the waters on the earth's surface
- 9. the cycle of processes by which water circulates between the earth's oceans, atmosphere, and land
- 10. the sticking together of particles of the same substance
- 12. the process of removing undesirable chemicals
- 18. the action or process of sticking to a surface or object
