

# GEO UNIT 1 VOCAB

**Across**

- 4. a 90 degree angle
- 5. all points on a graph
- 8. a set of points extending forever in a straight path
- 9. an address on a graph
- 12. bigger than 90 degree but less than 180 degree angle
- 16. angles that are diagonally across from each other
- 18. lines or planes that never intersect
- 20. it can only be a positive measurement

- 21. segments or lines that intersect at a 90 degree angle
- 22. a 180 degree angle
- 23. less than 90 degree angle

**Down**

- 1. lines or points in the same plane
- 2. the middle location on a segment
- 3. part of a line
- 6. a flat surface
- 7. using tool to draw a geometric figure

- 10. points on the same line
- 11. same size shape
- 13. a geometric tool used to draw circles
- 14. angles that share a side
- 15. 1 endpoint and extending for every in 1 direction
- 17. believed to be true without proof
- 19. formed by 2 rays
