# Gas Laws

## Across

- 6. amount of space occupied by matter
- 7. Volume is directly proportional to Temperature
- 8. amount of matter contained in a body
- 9. force exerted by the matter
- 10. Pressure and Volume are inversely proportional but both are directly proportional to temperature

## Down

- 1. Pressure is Inversely proportional to Volume
- 2. proponent of Gay-Lussac's Law(first name)
- 3. proponent of Boyle's Law(First Name)
- 4. coldness or hotness of an object.
- 5. Temperature is directly proportional to Pressure
