Across

4. What is the name of the process by which gametes are produced from diploid cells
 8. in the metric system, the basic unit of length is the _____
 9. what is the name of the two largest veins in the body
 12. viruses can replicate only inside a _____ cells
 13. what is the pH of pure water
 15. When heat is transferred through direct contact between two objects, this is known as _____
 16. when heat is transferred through electromagnetic waves, this is known as _____
 18. stratus and what other type of clouds produce precipitation

Word Bank

transpiration
 Conduction
 Gamete
 venae cavae
 gram

cerebellum
 herbivores
 Energy
 ligaments
 lower leg

radiation
 high blood pressure
 heterozygous
 host's
 bone marrow

capillaries
 seven
 Liter
 cumulus
 meiosis

refraction
 Pepsin
 pathogen
 meter

19. In the metric system, the basic unit of mass or weight is the _____

20. where in the body is the fibula located

21. primary consumers are also known as _____

23. When light bends due to passing through a medium, this bending is referred to as _____

24. if a person has two alleles that are different for a particular gene, that person is _____ for that particular gene.

Down

1. these smallest blood vessels, which deliver oxygenated blood to body's tissues

2. what is the common name for hypertension

3. in the metric system, the basic unit of volume is the _____.

5. when water evaporates from the leaves of plants, this is known as _____

6. The _____ is the portion of the brain that controls balance and muscle coordination.

7. _____ breaks down proteins in the stomach

10. _____ is a disease causing agent, such as a bacterium or virus

11. _____ connect bones to other bones

14. _____ is a reproductive cell

17. where in the body are blood cells created

22. _____ can be defined as the capacity to do work.
